

**FELLERT™**

## About

**Architectural firm:** Davidson Tarkela Architects Oy  
**Architect:** Aki Davidson  
**Location:** Tölvöviksparken, Helsinki  
**Area with Fellert:** 6,500 sq ft/1,500 m<sup>2</sup>  
**Product:** Fellert Even Better Sahara  
**Fellert installer:** Acoustic Scandinavia Oy  
**Type of project:** Type of project

# Auditing with extraordinary architecture

When the new main office for the international auditing and advisory giant KPMG was being planned, the objectives were sky high — not the least with consideration to the building’s fashionable address and central location. The design would be bold, both with respect to architecture and the environment, while reflecting the values represented by the KPMG name. Fellert’s assignment was to create a just as extraordinary impression on the inside.

striking facade. More than 2,000 glass panels with special prints create a living 3D effect that makes the building stand out and gives it a nearly organic appearance. The Finnish main office is a substantial structure of more than 172,000 square feet (16,000 square meters), with hard surfaces such as glass and stone dominating the interior environments, and large sweeping ceilings. The ceilings are elegant and seamless, as is to be expected with Fellert’s technique, but what’s truly remarkable is the excellent acoustic environment in these expansive spaces.

The building, with the stunning views of Tölvöviksparken and downtown Helsinki, has an equally

**Project summary:**

- High esthetic and functional requirements
- Large surfaces with dominating hard materials
- Tough environmental requirements: LEED Gold Certificate
