

Product Data Sheet

Even Better Access panel

Product Description

A discrete, fully integrated access panel to fit the 25 mm (1") and 39 mm (1,5") Fellert Even Better Acoustical System. The hatch panel is made of the same absorbent board and acoustical plaster as the surrounding ceiling to minimize loss of acoustical absorption and to ensure a discrete, integrated appearance. The access panel is mounted directly to the suspension grid. Press and release on the plate fittings to open panel. Press and release to secure panel into locked position.

Installation

As described in Assembly layouts. Available on www.fellert.com.

Properties

Powder coated steel. Corrosion resistant on request.

Color: RAL 9010 .

Custom colors available on request.

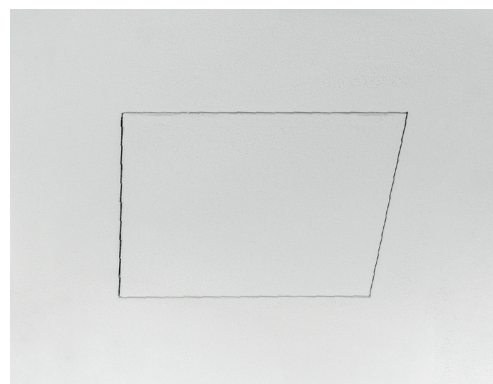

The Even Better Access Panel is available in four different standard sizes:

300x300 mm (11,8x11,8 inch), 400x400mm(15,7x15,7 inch),

455x455 mm (17,9x17,9 inch), 600x600 mm (23,6x23,6 inch),

Custom sizes are available on request.

Delivered in individual cases, each containing one access panel, security wire, Z-plates and installation screws.

Storage

Store in enclosed dry environment. Keep the Even Better Access Panels in their boxes until they are to be installed.
